

Easergy P3

Schneider Electric Relay

Based on more than 100 years of experience in network protection relays, Easergy P3 benefits from the reliability of Sepam, MiCOM and Vamp.

Easergy P3 is a complete range of protection relays for medium voltage applications, including feeder, motor, transformer, and generator protection. It embeds all the latest communication protocols on serial or Ethernet links.

Efficiency

- Simple selection and ordering
- Simplified configuration with the new eSetup Easergy Pro setting tool
- Faster delivery with on-the-shelf availability of standard configurations

Better Connectivity

- 9 communication protocols in one box, including IEC 61850
- Increased number of inputs and outputs for more possibilities

Enhanced Safety

- Embedded arc protection
- Built-in virtual injection testing
- Compliant with international standards (i.e. IEC 60255-1)

Easergy P3 Range Overview
